CAVEO®

TS007 3 STAR SNAP SECURE DIMPLE EURO CYLINDER

Introducing the CAVEO Secure range of dual finish euro cylinders featuring a high security dimple mechanism with verification on 2 independent levels and a reversible keyway.

Achieving the highest security standards available, including BSI Kitemarked TS007 3*, Sold Secure Diamond and Secure By Design 'Police Approval'. The CAVEO Secure cylinder is certified to offer the best protection against attack with a strong resistance to bumping, snapping, picking and drilling.

SNAP RESISTANT

The cylinder is supplied complete with a sacrificial cut on the external side. Upon attack it is designed to snap & lock the cam in place using 'CAVEO Secure' technology.

The CAVEO Secure Technology ensures that the internal side of the cylinder will remain operable at all times, even in the event of the external side being compromised.

TEMPERATURE RESISTANT

With BS EN1303:2015 certification, the cylinders have been tested to operate in extreme temperatures.

PICK, BUMP & DRILL RESISTANT

With a uniquely shaped keyway, anti-bump pins as well as anti-drill pins, the cylinders are highly resistant against any form of attack.

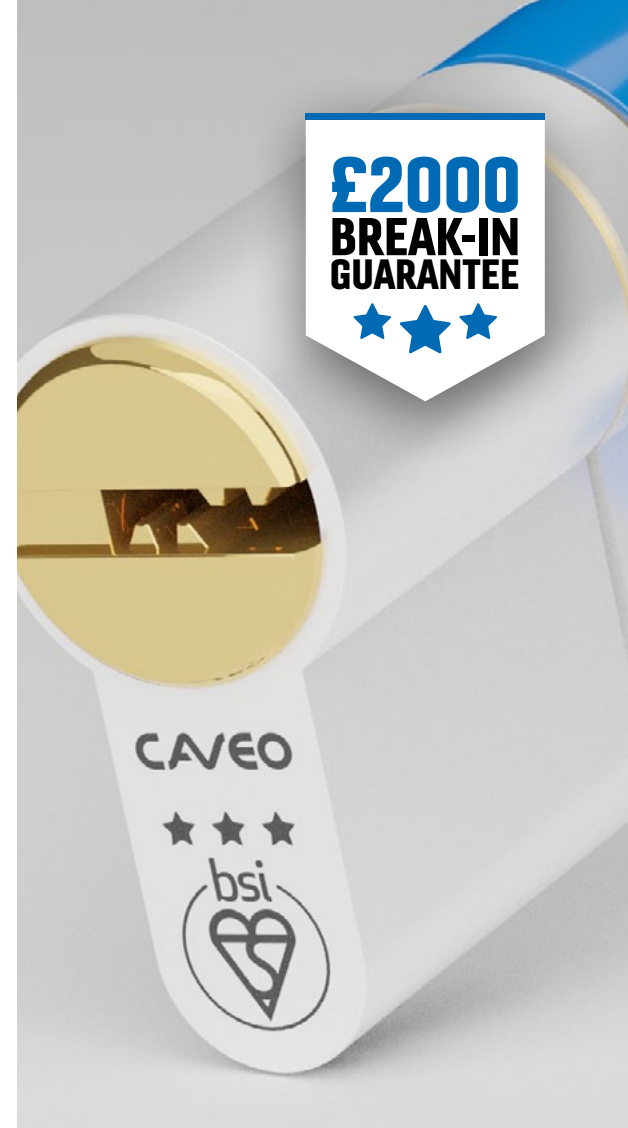

BREAK-IN GUARANTEE

We are so confident in the security of the CAVEO Secure cylinders that we supply all 3 Star rated euro cylinders complete with a £2,000 cash back guarantee should entry to the property be confirmed via snapping.

*Please note guarantee must be activated once installed using the key card code provided, the cylinder maintained to the required standards provided in the instructions and only use of genuine CAVEO keys to remain valid.

**£2000
BREAK-IN
GUARANTEE**

CAVEO®

BREAK-IN GUARANTEE

In the event of a burglary taking place within 5 years from the date of installation, with entry being achieved by snapping the CAVEO Cylinder, we will pay £2,000 to all proven claims.

The claim should be returned to us within 14 days of any burglary taken place.

Activation must be completed within 28 days of installation. All claims must be made via the CAVEO website: www.caveo-lock.co.uk

SAFETY FEATURE

In the event of a Thumbturn Cylinder being attacked, the inside thumbturn will lock in position. To disengage it please pull the thumbturn away from the door and then turn.
